Naples, FL (Collier County)	Master-Planned Clubhouse	Storefront + Window Wall	ESWindows Impact Series	Exposure C

EXECUTION

Amenity-grade glazing for a Collier County luxury community.

Wild Blue is a master-planned residential community in Naples, Collier County, with a centerpiece clubhouse and amenity complex developed to a specification level that matches the expectations of the Southwest Florida luxury market. American Commercial Glass was engaged as the Division 08 subcontractor for the full glazing scope of the clubhouse building.

ACG's scope covered ESWindows impact-rated storefront and window wall systems across the clubhouse structure — a mix of entry storefront, view glazing at indoor-outdoor transition zones, and architecturally prominent window wall elements. Every assembly was specified to meet Collier County's Exposure C coastal requirements while maintaining the design intent for transparency and daylighting throughout the amenity spaces.

Left: rear elevation during construction. Right: entry door assemblies, ESWindows impact glazing.

"Amenity buildings demand a level of precision that goes beyond code compliance — the glazing is part of the architectural identity of the space."

RESULT

Clubhouse glazing executed to luxury amenity spec.

ACG delivered the full glazing scope at Wild Blue Clubhouse, with all ESWindows impact assemblies installed to specification and coordinated with the general contractor's schedule. The project demonstrates ACG's capability at the amenity-grade specification level that defines Southwest Florida's premier master-planned communities.

Left: interior glazing at completion. Right: storefront installation in progress.

KEY OUTCOMES

- Complete clubhouse glazing scope: ESWindows impact storefront and window wall installed to code.
- Exposure C coastal design pressure requirements met across all assemblies.
- Indoor-outdoor transition zones — entry and view glazing — delivered to the design architect's specification.
- ACG's SW Florida (Naples) office provided regional coordination and schedule accountability.
- Project adds to ACG's established track record in the Collier County luxury amenity segment.
